Nick Kassanis

Senior Vice President

Business Development + Technical Services

PE, CBCP, LEED AP BD+C

Summary

Nick Kassanis is the Senior Vice President – Business Development and Technical Services here at Sustainable Investment Group, and he also runs the company's San Francisco office. In this role, he focuses on managing Commissioning, Retro-Commissioning, Energy Modeling, ASHRAE Level I & II Energy Audit projects and LEED related scope, while also helping the company grow business nationwide. Nick is a licensed Professional Engineer with extensive energy modeling experience having modeled over 10 million square feet of office, laboratory, university, hospital, school, mixed-use and warehouse projects. Nick specializes in the integrated design process for new construction projects and in-depth retro-commissioning investigations to promote energy efficiency and building operating staff training. On top of being a Professional Engineer, Nick is also a Certified Building Commissioning Professional and certified in LEED AP Building Design and Construction.

Nick's interest in the engineering in the built environment grows past just his work here at SIG, as he is a Past President of the ASHRAE Atlanta Chapter, serving through 2017 and is now active with the ASHRAE Golden Gate chapter in San Francisco, CA. With extensive firsthand experience and strong knowledge base in commissioning for new and constructed buildings, Nick is an expert at explaining new developments and industry changes as they relate to the built environment.
